

Valued Customer To Whom It May Concern

January 2021

REACH with Ecolab

Dear Valued Customer,

Based on current and available information, only a very small segment of Ecolab products sold within the European Union contain Substances of Very High Concern (SVHC) as listed on the Candidate List published by the European Chemicals Agency (ECHA).

To view the Candidate List of SVHC, please visit: <https://echa.europa.eu/candidate-list-table>

This table reflects the affected Ecolab products. There were no additional Ecolab substances or products affected by the updated Candidate List as of **19 January 2021**.

EINECS #	CAS #	Product
233-139-2	10043-35-3	INTERMEDIATE KITCHENPRO WASH'NWALK, KITCHENPRO WASH'N WALK, P3-ULTRASIL 62
215-540-4	1303-96-4	INCIDIN PD
208-764-9	541-02-6	(P3-)LUBOSTAR CP
209-136-7	556-67-2	(P3-)LUBOSTAR CP
-	68439-47-4	PREMIX F777, IOSAN SILKDIP
212-828-1	872-50-4	SIGELLA STAR

Ecolab tracks the percentage of products in our portfolio that contain SVHCs. Currently less than 2.0% of our product portfolio is affected.

Although the REACH regulation does not apply to articles, it may apply to substances contained in articles when Substances of Very High Concern (SVHC) are present in the article above 0.1% (w/w) concentration. Ecolab purchases articles (equipment) from third parties. We are in the continuous process of obtaining information about SVHCs in articles from our suppliers and will provide updates as information is available.

If you would like more information regarding our position on REACH, please visit our website at www.ecolab.com. If you have further questions, please contact me directly or send your query to Reach@ecolab.com.

Sincerely yours,

Dr. Ludger Grunwald

Valued Customer To Whom It May Concern

January 2021

REACH with Ecolab

Dear Valued Customer,

The obligations from the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Regulation (EC) No. 1907/2006 for manufacturers, formulators and the final downstream users differ according to their role. Ecolab has an active program in place to secure customer's processes through REACH Regulation.

According to Article 33 of REACH, suppliers of articles have the obligation to inform downstream customers of the presence of Substances of Very High Concern (SVHC)¹ in articles² when the concentration is above 0.1% weight by weight (w/w). Article suppliers are required to communicate actively in order to provide sufficient information to allow the safe use of the article, including as a minimum, the name of the substance.

Based on information received from our upstream suppliers, only a small subset of products is assembled with articles containing SVHC exceeding 0.1% (w/w) concentration. The table below includes the identified SVHC, as well as Ecolab products where this substance is present above 0.1% (w/w):

Substance Name	CAS #	Products	Safe Use
Lead	7439-92-1	Peristaltic pump WP10-P4M2-WI6-B	The product contains LEAD. Do not destroy the pump in order not to contact the lead part. Wear gloves when replacing the tubing or take care not to touch on shaft.

We will keep monitoring the presence of SVHCs in our articles and updating the previous information as needed.

You can refer to the Candidate List of SVHC at: <https://echa.europa.eu/de/candidate-list-table>

¹ The REACH Regulation (EC) 1907/2006 defines substances of very high concern ("SVHCs") as substances that are classified as: carcinogenic, mutagenic or toxic for reproduction ("CMR") Category 1A or 1B, persistent, bioaccumulative and toxic ("PBT"), very persistent and very bioaccumulative ("vPvB"), endocrine disruptors, or raise other equivalent health and environmental concerns.

² An article is defined by REACH Art.3 as an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.

If you would like more information regarding our position on REACH, please visit our website at <http://www.ecolab.com>. If you have further questions, please contact me directly or send your query to REACH@nalco.com.

SCIP database for information on **Substances of Concern** in articles as such or in complex objects (Products) established under the Waste Framework Directive (WFD).

From 5 January, 2021 companies supplying articles containing substances of very high concern (SVHCs) on the Candidate List in a concentration above 0.1% weight by weight (w/w) on the EU market have to submit information on these articles to ECHA. Ecolab has submitted dossiers to SCIP database for the impacted articles. We are aware this new duty ensures that the information on articles containing substances of very high concern (SVHCs) on ECHA's Candidate List is available throughout the whole lifecycle of products and materials, including the waste stage.

Sincerely yours,
